INTRODUCTION

SAFETY PRECAUTIONS

 The "SAFETY PRECAUTIONS" indicated in the manual contain important information pertaining to your safety. Be sure to observe them.

This mark indicates procedures which, if improperly performed, might lead to the death or serious injury of the user.

In the event of a malfunction (burning smell, etc.), immediately stop operation, turn off the electrical breaker, and consult authorized service personnel.

Do not repair or modify any damaged cable by yourself. Let the authorized service personnel to do it. Improper work will cause an electric shock or a fire.

When moving, consult authorized service personnel for uninstallation and installation of this unit.

Do not touch with wet hands. It may cause an electric shock.

If children may approach the unit, take preventive measures so that they cannot reach the unit.

Do not repair or modify by yourself. It may cause a fault or accident.

Do not use flammable gases near the unit. It may cause a fire from leaking gas.

Dispose of the packing materials safely. Tear and dispose of the plastic packing bags so that children cannot play with them. There is the danger of suffocation if children play with the original plastic bags.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

This mark indicates procedures which, if improperly performed, might possibly result in personal harm to the user or damage to property.

Do not set vessels containing a liquid on this unit. Doing so will cause heating, fire or electric shock.

Do not expose this unit directly to water. Doing so will cause trouble, electric shock or heating.

Do not place electrical devices within 1 m (40 in) of this unit. It may cause malfunction or failure.

Do not use fire near this unit or place a heating apparatus nearby. It may cause malfunction.

Do not touch the switches with sharp objects. Doing so will cause injury, trouble, or electric shock.

Do not insert articles into the slit parts of this unit. Doing so will cause trouble, heating, or electric shock.

SYSTEM OUTLINE

1 Terminology

System related terms (+ is for VRF system)

(a) VRF system ♦:

VRF (Variable Refrigerant Flow) is a large multi system that effectively air conditions a wide variety of spaces from large buildings to personal residences.

- (b) Other system: Multi or single type air conditioning system other than VRF system.
- (c) Heat recovery system ♦:
 - The indoor unit connects to the outdoor unit via an RB unit in this system. RB units of single type and 4-system multi type are available . Indoor units connected to RB units of a different system perform cooling operation and heating operation simultaneously. An indoor unit connected to an outdoor unit without going through an RB unit are for cooling only.
- (d) Heat pump system: This is standard system

This is standard system. Indoor units connected to the same outdoor unit do not perform cooling operation and heating operation simultaneously.

- (e) RB Group [for heat recovery system] ★: A group of indoor units connected to a single type RB unit or each system of a multi type RB unit. Cooling operation and heating operation are not performed simultaneously in an RB Group.
- (f) R.C. Group (Remote Controller Group): This forms a group by connecting indoor units by remote controller cable. One unit of ungrouped indoor unit makes up an R.C. Group. It is the minimum unit of operation.
- (g) Refrigeration system: This is a system composed of indoor units and outdoor units connected by the same refrigerant piping.
- (h) System ♦: This is 1, 2 or more refrigerant systems connected by the same transmission cable.
- (i) Central controller ♦: A central remote controller can control multiple R.C. Groups. There is a system controller, Touch panel controller, and a central remote controller.
- (j) Standard remote controller: A standard remote controller is a remote controller which controls 1 R.C. group. This unit corresponds to this. This unit cannot be used together with a 3-wire type wired remote controller. A wireless remote controller can be used together with this unit.

Address related terms

- (k) Indoor unit address ♦: This is an ID individually assigned to each indoor unit.
- (I) Remote controller address:

This is an ID individually assigned separately from the indoor unit address to indoor units which form an R.C. Group.

2 Password configuration

This unit can set the following 2 kinds of passwords:

(a) Password

This is a password for administrator. Password is requested by the setting which requires management. For a description of password setting and change, refer to [3. SETTING] \rightarrow [3.8 Initial Setting] \rightarrow [3-8-6 Password Setting].

(b) Installer password

This password is requested for important settings at installation.

Note

If you forget your password, contact your local dealer.

3 Name of parts

- (a) Touch panel display
 - When the screen is touched or the On/Off button is pressed while backlight is set to Enable, backlight lights. Backlight goes off 30 or 60 seconds after the last operation. When backlight is set to Disable, it does not light. For a description of backlight setting, refer to [3 SETTING]→[3-7 Preference]→[3-7-2 Backlight Setting].
 - Lightly touch the touch panel with your finger tips. A commercially available stylus pen can also be used. If pushed with too much force or operated with a rod, pencil, or ballpoint pen, etc., the display may be scratched or damaged.
 - Do not touch 2 or more places simultaneously. Correct operation cannot be performed.
 - When cleaning the touch panel display, setting child safety lock prevents erroneous operation. (Refer to [1 MONITOR] → [1-1 Monitor] → [1-1-3 Child Lock].)
 When cleaning, do not use detergent or alcohol, paint thinner, etc. It will cause accidents or loss of appearance.
- (b) LED lamp (Power indicator) Lights while the indoor unit is operating. Blinks when an error is generated.
- (c) On/Off button
- (d) Room temperature sensor (inside) Setting is necessary to use this sensor. Refer to [3 SETTING] → [3-8 Initial Setting] → [3-8-5 R.C. Sensor Setting].

MONITOR

Monitor

1-1-1 Monitor mode screen

Monitor mode screen is the home screen of this unit.

- (a) R.C. group name: Name of the remote controller group to which this unit is connected. Refer to [3 Setting] \rightarrow [3-8 Initial Setting] \rightarrow
 - [3-8-4 R.C.Group Name Setting].
- (b) Clock:

Refer to [3 SETTING] → [3-8 Initial Setting] → [3-8-2 Date Setting].

- (c) Mode: When this is touched, the display switches to the "Mode" screen. Refer to [2 CONTROL] → [2-2 Operation Settings] \rightarrow [2-2-1 Set the Operation Mode].
- Set temp .: (d)
 - When this is touched, the display switches to the temperature setting screen. Refer to [2 CONTROL] \rightarrow [2-2 Operation Settings] \rightarrow [2-2-2 Set the Temperature].
- (e) Fan:

When this is touched, the display switches to the fan speed setting screen. Refer to [2 CONTROL] \rightarrow [2-2 Operation Settings] \rightarrow [2-2-3 Set the Fan Speed].

(f) Room temp .:

The ambient temperature sensed by this unit is displayed. Refer to [3 SETTING] → [3-8 Initial Setting] → [3-8-7 Display Item Setting].

- Menu: (q) When this is touched, the display switches to the "Menu" screen. Refer to [3 SETTING].
- Status: (h) When this is touched, the display switches to the "Status" screen. Refer to [1-1-2 Status display].
- Status icons: (i)

▲ An error occurred. Refer to [1-1-2 Status display] → < Error Information screen >.

- X Operation from this unit is prohibited by the Central Controller. Refer to [1-1-2 Status display].
- Mode mismatch. The mode which cannot operate simultaneously is selected. Refer to [1-1-2 Status display].
- ([‡]) The On Timer, Off Timer, or Auto Off Timer is set. Refer to [3 SETTING] \rightarrow [3-3 Timer Setting].
- [0, 0] The weekly timer is set. Refer to [3 SETTING] \rightarrow [3-4 Weekly Timer Setting].
- The set temperature automatic return setting is set. Refer to [3 SETTING] \rightarrow [3-5 Special Setting] \rightarrow [3-5-2 Set Temp. Auto Return].

- It shows that it is time to clean the filter. Refer to $[3 \text{ SETTING}] \rightarrow [3-9 \text{ Maintenance}] \rightarrow [3-9-3 \text{ Filter}]$ Sign Reset].
- The temperature sensor of this unit is used. Refer to $[3 \text{ SETTING}] \rightarrow [3-8 \text{ Initial Setting}] \rightarrow [3-8-5 \text{ R.C.}]$ Sensor Settinal.

For the screen display other than Chinese, this product uses a Bitmap font made and developed by Ricoh Company. Ltd.

1-1-2 Status display

The remote controller and indoor unit setting status are displayed.

Touch the [Status] on monitor mode screen. "Status" screen is displayed.

		Fri 10:00AM		
Mode	Set Temp.	Fan		
Cool	26.0 ₀	Auto		
	Status	Menu		

The "Status" screen has 2, 3 or 4 pages which are switched by touching the [Next Page] or [Previous Page]. When the [Monitor] is touched, the display returns to the monitor mode screen

(*: Items that indoor unit does not support are not displayed.) < Page 1 >

Air Flow Direction*:

The air flow direction setting is displayed. The setting will appear only for indoor units which can set air flow directions

"Individual" is displayed only when this remote controller is connected to the indoor unit which supports the appropriate function. When setting is performed, $[\checkmark]$ is displayed. Refer to [3 Setting]→[3-2 Air Flow Direction Setting]→[3-2-3 Individual VT Hold].

Economy:

ON or OFF of the economy setting is displayed.

Anti Freeze*: ON or OFF of the anti freeze setting is displayed.

< Page 2 >

R.C. Prohibition:

The functions whose operation from this unit and Wireless type remote controller is prohibited by the Central Controller are displayed by icons. The contents of each icon are as follows:

All	:All operations
1	·On

//

:Filter sign reset

When you try to operate or set the prohibited function, the following screen is displayed and operation or setting is not possible. When the [Close] is touched, the display returns to the screen before operation was performed.

Setting is prohibited.
Close

< Page 2 (to 3 or 4) >

Status	Page 3/4

Monitor Previous Next Page Page	

Status		Page 4/
Special State + Human Se + Fan Contro	r Setting r Energy Saving	
Monitor	Previous	

• Special State (Page 2, 3 or 4)

The indoor unit status is displayed. When the contents to be displayed exceeds 3, they are displayed on the next page (Page 3 or 4). The status contents are as follows: (Only items that indoor unit supports or operating items are displayed.)

Under Maintenance:

Indoor unit is inspected. Indoor unit operation is stopped during this time.

Forced Stop:

Indoor unit is stopped forcibly by external input.

Mode Mismatch:

A mode which cannot be operated simultaneously with a master indoor unit or other operating indoor unit is set in the same RB group of a heat recovery system or in the same refrigerant system of a heat pump system. In this case, since the mode is switched to the fan mode, reset to a mode that can be operated simultaneously. Refer to [4 OPERATION TIPS] \rightarrow [4.1 Selectable Modes] for the modes which can be operated simultaneously.

Operation Controlled:

This content is displayed at the Slave indoor unit when Master indoor unit is set in the refrigerant system or RB Group to which this unit is connected. When a Master indoor unit is not set, this shows that there is already another indoor unit operating. Only a mode set by Master indoor unit or a mode that can be operated simultaneously with another operating indoor unit can be selected. Refer to [4.OPERATION TIPS] for the modes which can be operated simultaneously.

Set Temp. Limited:

Indoor unit temperature setting is limited by the Central controller.

Energy Saving Operation:

The energy saving is set by the Energy Manager for System Controller.

Defrost:

At heating operation, the outdoor unit performs Defrost operation. The indoor unit fan is stopped during this time.

Oil Recovery:

The outdoor unit performs oil recovery operation. The indoor unit fan may be stopped during this time.

Human Sensor Setting:

This function is enabled. Refer to [3 Setting] \rightarrow [3-5 Special Setting] \rightarrow [3-5-5 Human Sensor Setting].

Fan Control for Energy Saving:

This function is enabled. Refer to [3 Setting] \rightarrow [3-5 Special Setting] \rightarrow [3-5-6 Fan Control for Energy Saving].

< Error Information screen >

[Error Information] is displayed only when there is an error history. When the [Error Information] is touched, the display switches to "Error Information" screen. Refer to [5-3 ERROR CODE] for the errors.

1-1-3 Child Lock

When this screen is displayed by touching the monitor mode screen, the unit is in child safety lock.

Child safety lock set/reset:

Press the On/Off button for 4 seconds or more while touching an area outside the operation section of the monitor mode screen (no response even if touched). Set/reset can be performed even while the indoor unit is stopped. The setting cannot be performed at screens other than the monitor mode screen.

1-1-4 Emergency Stop

This screen is displayed when the system was emergency stopped by operation from the outside. When emergency stop is reset, the monitor mode screen is displayed.

Emergency Stop

2 CONTROL

2-1 On and Off

(1) Press the [On/Off] button.

The LED lamp remains lit while the indoor unit is operating.

Note

The On/OFF button cannot be operated at screens other than the monitor mode screen.

2-2 Operation Settings

2-2-1 Set the Operation Mode

- (1) Touch the [Mode] on the monitor mode screen.
- (2) "Mode" screen is displayed. Select the operation mode.

Notes

- Only selectable modes are displayed. The selectable modes may be different depending on the system configuration and operation status. Refer to [4.OPERATION TIPS]→[4-1 Selectable modes].
- When the "Fan" is selected, the temperature cannot be set.

		Fri 10:00AM
Mode	Set Temp.	Fan
Fan		Auto
	Status	Menu

- When "Auto" is selected at "Master Indoor Unit", "(Auto)" is displayed at the monitor mode screen of Slave Indoor Unit.
- When the operation mode is switched in a heat recovery system, operation preparations may take some time, but this is not a malfunction.
- (3) When the [OK] is touched, the display returns to the monitor mode screen.

2-2-2 Set the Temperature

- (1) Touch the [Set Temp.] on the monitor mode screen.
- (2) "Set Temp." screen is displayed. Adjust the room temperature with the [▲] or [▼].

Notes

- The settable temperature range is different depending on the operation mode. Refer to [4 OPERATION TIPS]—[4-3 Selectable Temperature Range].
- When the "Set Temp. Range Setting" is set, the selectable temperature conforms to the setting. Refer to [3 SETTING] → [3-5 Special Setting] → [3-5-3 Set Temp. Range Setting].
- (3) When the [OK] is touched, the display returns to the monitor mode screen.

2-2-3 Set the Fan Speed

- (1) Touch the [Fan] on the monitor mode screen.
- (2) "Fan" screen is displayed. Select the fan speed with the
 [▲] or [▼].

(3) When the [OK] is touched, the display returns to the monitor mode screen.

3 SETTING

3-1 Select the Setting Items

(1) Touch the [Menu] on the monitor mode screen.

Fri 10:00AM					
Mode	Set Temp.	Fan			
Cool	26.0 ₀	Auto			
Status Menu					

 "Main Menu" screen is displayed. The screen has 2 pages which are switched by touching the [Next Page] or [Previous Page].
 (Items that indoor unit does not support are not dis-

played.)

Main Menu	Page 1/2	Main Menu			Page 2/2
Air Flow Direction Setting	Timer Setting	Summer Setting	Time	Pr	eference
Weekly Timer Setting	Special Setting	Initial Se	tting	Ma	intenance
Monitor	Next Page	Monitor	Prev Pag		

When the item to be set is touched, each setting screen is displayed. Refer to the description of each item for details. When each setting is complete or canceled, the display returns to this screen. When [Monitor] is touched, the display returns to the monitor mode screen.

3-2 Air Flow Direction Setting

 Touch the [Air Flow Direction Setting] on the "Main Menu" screen.

Main Menu	Page 1/2
Air Flow Direction Setting	Timer Setting
Weekly Timer Setting	Special Setting
Monitor	Next Page

Note

For the indoor units without air flow direction adjustment function, [Air Flow Direction Setting] is not displayed.

(2) "Air Flow Direction Setting" screen is displayed. When the [VT Setting] or [HZ Setting] is touched, each setting screen is displayed.

Air Flow	Dire	ction Se	tting		
VT Setting		1	HZ Setting	40	
[1	1	[3]
					_
Back					

When the indoor unit does not have a horizontal air flow direction adjustment function, [HZ Setting] is not displayed and the air flow direction cannot be set.

When this remote controller is connected to the cassette type indoor unit with individual air flow control function, [Individual VT Hold] is displayed.

Air Flow Direction Setting		
VT Setting [1]		
Individual VT Hold	[]	
Back		

For this operation, refer to "3-2-3 Individual VT Hold".

When the [OK] or [Cancel] is touched at each setting screen, the display returns to this screen. When [Back] is touched, the display returns to the "Main Menu" screen.

Note

When using this unit together with a wireless remote controller, the air flow direction of the indoor unit may not match the direction indicated on this unit.

3-2-1 VT Air Flow Direction

- (1) Touch the [VT Setting] on the "Air Flow Direction Setting" screen.
- (2) "VT Air Flow Direction Setting" screen is displayed. Touch
 [▲] or [♥] and set the air flow direction or "Swing".

(3) When the [OK] is touched after setting, the data is transmitted to the indoor unit and the display returns to the "Air Flow Direction Setting" screen.

3-2-2 HZ Air Flow Direction

- Touch the [HZ Setting] on the "Air Flow Direction Setting" screen.
- (2) "HZ Air Flow Direction Setting" screen is displayed. Touch
 [◀] or [▶] and set the air flow direction or "Swing".

(3) When the [OK] is touched, after the data is transmitted to the indoor unit, the display returns to the "Air Flow Direction Setting" screen.

3-2-3 Individual VT Hold

"Individual VT Hold" can be used only with cassette type indoor unit which supports this function. The air flow direction can be set for each outlet of single or multiple indoor units connected to this remote controller.

- (1) Touch the [Individual VT Hold] on the "Air Flow Direction Setting" screen.
- (2) When multiple indoor units are connected to this remote controller, the indoor unit selection screen is displayed. When only one indoor unit is connected, the screen of (3) is displayed. When the screen (2) has 2 pages, they can be switched by touching the [Next Page] or [Previous Page]. When this remote controller is connected to multiple indoor units, the address (XX-XX) is displayed for each indoor unit. Touch the indoor unit to be set. [✓] is displayed at the set indoor units.

Notes

- To clear the air flow direction setting of all the displayed indoor units, touch [Reset]. When [Yes] of the confirmation screen is touched, the setting is cleared and switches to the air flow direction setting of "VT setting" (Refer to 3-2-1).
- When you want to change the order of the indoor units displayed on the indoor unit selection screen, consult your installer or service personnel.

(3) The outlet port selection screen that sets the air flow direction is displayed. Touch the outlet port to be set. Check the position of each outlet port based on "◆" mark of the indoor unit body.

Notes

- When the air flow direction setting of "VT setting" (Refer to 3-2-1) is set at the outlet port, "—" is displayed at the outlet port screen.
- To clear all four outlet port settings, touch [Reset]. When [Yes] of the confirmation screen is touched, the setting is cleared and switches to the air flow direction setting of "VT setting" (Refer to 3-2-1).
- (4) The air flow direction setting screen is displayed. Touch [▲] or [♥] and set the air flow direction or "Swing".

When the [OK] is touched, the display returns to the screen of (3).

When the [Back] is touched at the screen of (3), the display returns to the screen of (2).

When the [Back] is touched at the screen of (2), the display returns to the screen of (1).

3-3 Timer Setting

- (1) Touch the [Timer Setting] on the "Main Menu" screen.
- (2) "Timer Setting" screen is displayed.

(2)

Timer Setting	
On Timer	[Disable]
Off Timer	[Disable]
Auto Off Timer	[Disable]
Bac	(

The following timer settings are possible:

• On Timer:

The stopped indoor unit starts to operate after the set time.

• Off Timer:

The operating indoor unit stops to operate after the set time.

• Auto Off Timer:

When indoor unit operation is started by the On/Off button of this unit, operation stops after the set time.

When the item to be set is touched, the display switches to each setting screen. When each setting is complete or canceled, the display returns to this screen. When [Back] is touched, the display returns to the "Main Menu" screen.

3-3-1 On Timer

 Touch the [On Timer] on the "Timer Setting" screen. When the "Password Verification" screen is displayed, enter the password and touch [OK].

Schedule Setting	[None]
Day Off Setting	[None]
Back	

The following contents are set:

· Enable Schedule:

The schedule to be used is selected or the Weekly Timer is disabled temporarily .

· Schedule Setting:

The daily operating schedule is created. Two schedule patterns can be created. Up to 8 times setting for each day can be set.

· Day Off Setting:

Weekly Timer can be disabled for any day within a range of 1 week. This is convenient when operation is not necessary on holidays, etc. When the set day has passed, its setting is cleared.

When the item to be set is touched, each setting screen is displayed. Refer to the description of each item for details. When each setting is complete or canceled, the display returns to this screen. When [Back] is touched, the display returns to the "Main Menu" screen.

3-4-1 Enable Schedule

Select the schedule to be used.

- Touch the [Enable Schedule] on the "Weekly Timer Setting" screen.
- (2) "Enable Schedule" screen is displayed. Select and touch [Schedule 1] or [Schedule 2].

(3) When the [OK] is touched, after a setting change screen is displayed, the display returns to the "Weekly Timer Setting" screen.

Note

To disable use of a schedule already set , touch [None] at screen of (2).

3-4-2 Schedule Setting

Select the schedule to be set.

- (1) Touch the [Schedule Setting] on the "Weekly Timer Setting" screen.
- (2) "Schedule Setting" screen is displayed. When the [Schedule 1] or [Schedule 2] is touched, each setting screen is displayed.

[1]		(1	2)

Weekly Timer Setting	Special Setting	
Monitor	Next Page	

(2) "Special Setting" screen is displayed. When the screen has multiple pages, they can be switched by touching the [Next Page] or [Previous Page].

The following contents are set:

(*: Items that indoor unit does not support are not displayed.)

• Economy:

The temperature setting is offset automatically over a certain period of time. The power consumption is suppressed by setting the temperature high during cooling and low during heating.

- Set Temp. Auto Return (for administrator): Even if the temperature setting is changed during Cool or Heat mode operation, after the set time, the temperature automatically returns to the set temperature.
- Set Temp. Range Setting (for administrator): Power consumption by excessive temperature setting is suppressed by restricting the temperature setting range for each operation mode of Auto, Cool/Dry, or Heat.
- Anti Freeze* (for administrator): Anti Freeze is a function that performs low temperature heating operation to prevent freezing of water lines and equipment, when air conditioning operation is off, in regions where outside temperature may drop below freezing.

If water lines are far from the unit or within exterior walls, this function may not provide enough anti freeze protection.

 Human Sensor Setting* (for administrator): "Human Sensor" detects the absence of a person in the room and performs the following energy saving operation. For details of "Human Sensor", refer to indoor unit operating manual.

[Auto Saving]

When the absence continues for the set time, the operation switches to energy saving operation.

[Auto Off]

When the absence continues for the set time, indoor unit operation stops.

 Fan Control for Energy Saving* (for administrator): When the set temperature is reached during cooling operation, the fan operates intermittently and power is saved.

When the item to be set is touched, the display switches to each setting screen. When each setting is complete or canceled, the display returns to this screen. When [Back] is touched, the display returns to the "Main Menu" screen.

3-5-1 Economy

On/Off of Economy

- (1) Touch the [Economy] on the "Special Setting" screen.
- (2) "Economy" screen is displayed. Touch the [On] or [Off] on the "Economy" screen.

When you touch the [OK], the data is transmitted to the indoor unit, and then the display returns to "Special Setting" screen.

3-5-2 Set Temp. Auto Return (for administrator)

 Touch the [Set Temp. Auto Return] on the "Special Setting" screen. When the "Password Verification" screen is displayed, enter the password and touch the [OK].

4 OPERATION TIPS

4-1 Selectable Modes (for VRF system)

There are restrictions on the selectable modes depending on the system configuration and operation status.

4-1-1 Heat recovery system

- (a) When single indoor unit connected to RB unit All the modes can be selected.
- (b) When a master indoor unit is set in an RB group, only the mode selected at the master indoor unit (*1) can be used. (*1: "Fan" cannot be selected at the indoor unit including the master indoor unit .)
- (c) When a master indoor unit is not set in the RB Group, refer to the following table.

Status	Selectable	Not selectable
Other indoor unit is in cool- ing operation.	Cool, Dry	Auto, Heat, Fan
Other indoor unit is in dehu- midifying operation.	Cool, Dry	Auto, Heat, Fan
Other indoor unit is in heat- ing operation.	Heat	Auto, Cool, Dry, Fan
Other indoor unit is in anti freeze operation.	Heat	Auto, Cool, Dry, Fan

4-1-2 When indoor units is connected for cooling only in heat recovery system

(a) Refer to the following table:

Status	Selectable	Not selectable
At any time	Auto, Cool, Dry, Fan	Heat

4-1-3 RB priority connection in heat recovery system

(a) For indoor units or RB groups by RB priority connection, refer to the following table:

Status	Selectable	Not selectable
Cooling priority is set by external input.	Cool, Dry	Auto, Heat, Fan
Heating priority is set by external input.	Heat	Auto, Cool, Dry, Fan

4-1-4 Heat pump system

(a) Refer to the following table:

Status	Selectable	Not selectable
Other indoor unit is in cool- ing operation.	Cool, Dry	Auto, Heat, Fan
Other indoor unit is in dehu- midifying operation.	Cool, Dry	Auto, Heat, Fan
Other indoor unit is in heat- ing operation.	Heat	Auto, Cool, Dry, Fan
Other indoor unit is in anti freeze operation.	Heat	Auto, Cool, Dry, Fan

(b) When a master indoor unit is set in a refrigerant system, only the mode selected at the master indoor unit (*2) can be used. (*2: "Fan" cannot be selected at the indoor unit including the master indoor unit .)

4-1-5 Outdoor unit priority connection in heat pump system

(a) Refer to the following table:

'	5		
	Status	Selectable	Not selectable
	Cooling priority is set by external input.	Cool, Dry	Auto, Heat, Fan
	Heating priority is set by external input.	Heat	Auto, Cool, Dry, Fan

4-2 Verification screen when setting is complete

(Example of screen)

The verification screen which is displayed when a setting is complete is displayed for approximately 3 seconds. When this screen is touched, the display switches to the next screen.

Setting changed.

4-3 Settable temperature range

The settable temperature range by operation mode and indoor unit setting is shown in the table below.

Cool/Dry	18 to 30 °C (64 to 88 °F)
Heat	VRF system: 10 to 30 °C (48 to 88 °F) Other system: 16 to 30 °C (60 to 88 °F)
Auto	18 to 30 °C (64 to 88 °F)

5 OTHERS

5-1 Outline Dimensions

Unit: mm (in)

5-2 Specifications

Model Name	UTY-RNR*Z1
Input voltage	DC 12 V
Power consumption	Max. 0.3 W
Display	3.8 inch FSTN LCD display (255 × 160 dots) with Touch panel
Usage temperature range	0 to 40 °C (32 to 104 °F)
Usage humidity range	20 to 90 % (no condensation)
Storage temperature range	-10 to 60 °C (14 to 140 °F)
Storage humidity range	20 to 90 % (no condensation)
Dimensions [H × W × D mm (in)]	120 × 120 × 20.4 (4-3/4 × 4-3/4 × 13/16)
Weight [g (oz)]	220 (7.76)

5-3 Error Code

For the details of the indoor unit or outdoor unit error when checking the error contents, refer to the error codes in each installation manual.

Error code	Contents
CC.1	Sensor error
C2.1	Transmission PCB error
12.1	Wired remote controller communication error
12.3	Number excess of device in wired remote controller system
12.4	Wired remote controller system start-up error
26.4	Address duplication in wired remote controller system
26.5	Address setting error in wired remote controller system
15.4	Data acquisition error
